The project at Rameswaram has been approved at an estimated cost of Rs.345.70 lakhs and the transmitter when commissioned into service is expected to provide service within a range of about 140 Kms. The coverage area of this transmitter over the sea is sought to be minimised by a suitable design of the antenna system.

On commissioning of these transmitters and transposer, TV service is expected to be available to about 88 per cent population of Tamil Nadu and all the districts in the State would then be covered by TV service, either wholly or partially.
